t.me/Mahdi_mortazavi1

I take a messy problem, reduce it to first principles, and ship the answer as software people actually use. I lead engineering and product at two startups and maintain seven open-source projects across mobile, desktop, web and the edge. Open to remote roles, contract work and technical co-founder positions.

EXPERIENCE

Senagh · CTO & Head of Product
2023 – present

AI-agent assistant for real-estate agents · senagh.ir

- Own the system architecture, the design of the AI agents and the product direction.
- Lead the build as technical lead, product manager and hands-on developer, from backend to client.

Zista Health · Co-founder & CTO

AI-powered remote patient monitoring

- Lead engineering and product for the platform, from the wearable to the apps.

Startup Legend · Founder

A community for people building startups and products.

SELECTED OPEN-SOURCE WORK

relay Kotlin · .NET 8 / WinUI 3 · Go · WireGuard
Shares an Android phone's internet with a Windows PC through one encrypted WireGuard tunnel. No root, no server, no account. My most-starred project.

Angaros Kotlin · Python · SQLite · Cloudflare Workers · MCP
Gives AI agents safe access to a phone's SMS, one-time codes, contacts and call log. End-to-end encrypted, with a self-hosted relay that stores only ciphertext, 22 typed MCP tools and a hash-chained audit log.

Overrun JavaScript · three.js · Durable Objects · WebSocket
Eight-player browser arena shooter. One simulation shared by client and server, client-side prediction with input replay, a quantised binary protocol, and no asset files.

Flow and **Nava** Flutter · Dart · Riverpod
Offline-first focus, habit and productivity apps with bilingual right-to-left interfaces.

Sooda TypeScript · PWA and **purify** Rust · Tauri
An offline-first pricing calculator for small shops, and a reversible Windows disk cleaner.

SKILLS

AI & agents
LLM agents, MCP servers, tool design, prompt-injection defences

Mobile
Flutter, Dart, Kotlin, Jetpack Compose

Desktop
Rust, Tauri, C#, .NET, WinUI 3

Web & edge
TypeScript, React, Astro, Node.js, NestJS, Cloudflare Workers, Supabase

Product
Problem framing, interface design, release engineering, technical writing

HOW I WORK

First principles before patterns. Design before code. Nothing counts until it ships.

Remote and async-friendly, with a full working day of overlap with Europe.

EDUCATION

B.S. Computer Science
Payame Noor University

Programming certificate
Codelita

LANGUAGES

Persian (native) · English
